

**CLAIMS**

1. An adhesive roll cleaner comprising a core tube and a plurality of adhesive tapes,  
each of the adhesive tapes having an adhesive applied to one side thereof to  
5 form an adhesive portion,  
each of the adhesive tapes being helically wound around the core tube in a layered configuration with the adhesive portion out,  
each of the adhesive tapes being wound with a gap of prescribed width  
between every adjacent turns, and  
10 the adhesive tape which is located at the upper layer having a larger width than that of the adhesive tape which is located at the lower layer.
2. The adhesive roll cleaner according to claim 1, wherein the width of the adhesive tapes increases stepwise toward the upper layer.
3. The adhesive roll cleaner according to claim 1, wherein the adhesive tapes each  
15 have a non-adhesive portion with no adhesive applied on both longitudinal sides of the adhesive tape.
4. The adhesive roll cleaner according to claim 1, wherein the gap between every adjacent turns has a width of 0.1 to 4.0 mm.
5. The adhesive roll cleaner according to claim 1, wherein the adhesive tapes each  
20 have a tear strength of 500 mN or greater as measured with an Elmendorf tear tester in accordance with JIS P8116.
